Evolvement of {Medical Care and Hospitals in Wasatch County:

Settlement of Provo River Valley began in 1858-1859.

In the beginning of the Snakecreek and Heber Settlements, People depended mainly on faith in their God and help from willing & Knowledgeable neighbors to help in times of sickness and maternity.

Then came Herb Doctors, healers and Midwives.

Trained Nurses now brought more expert care of the sick.

Now more scientific and Trained Doctors began to arrive.

The need for a place for these Doctors to work, then brought the Home Hospitals into the picture.

The first real Hospital was then started by Bert Dannenberg. It was called the Heber Hospital. Later his brother joined him from Kamas, Utah— Thomas Alexander Dannenberg.
